UNIVERSITY OF HAWAII

HONOLULU, HAWAII, FEBRUARY 2, 1927.

NO. 17.

## PRESIDENT CRAWFORD TAKES OFFICE

### MILITARY REVIEW IS HELD IN HONOR OF DR. A. L. DEAN

#### Retiring President Tells Place of R. O. T. C. In University Activities

A regimental review and parade in honor of Dr. Arthur L. Dean was staged by the university R. O. T. C. regiment on Cooke Field, Friday afternoon, January 21. In a talk to the regiment, Dr. Dean said:

"At the end of the present month I shall lay down the duties of the presidency of the University of Hawaii. This will be the last opportunity which I shall have to speak to you as members of the Reserve Officers' Training Corps. I shall use this opportunity which Colonel Clarke has given me to tell you as nearly as I can what I conceive to be the place of the R. O. T. C. in this university.

#### Evils Greater Than War

"War is an evil and hateful thing. We should set our faces against it. Nevertheless, there are things which are more evil than war, there are things which we should hate more than we hate war. There are things which are greater and of more importance than your life, or my life, or the life of any man. There are times when men must make every sacrifice, when men must even lay down their lives, to combat these greater evils and more hateful things, and to preserve the things

### Dr. K. D. Lum Speaks At P. P. U. Meeting

That the present tumultuous situation in China is the direct result of foreign exploitation, is the stand maintained by Dr. Kalfred Dip Lum, instructor of political science and international law, in an address before the Pan-Pacific Union Monday, January 24.

China cannot be held responsible for the anti-foreign demonstrations at Hankow, Lum said. A country has no obligation to protect the lives of foreign citizens in time of civil war, he pointed out.

Foreign aggressors have been responsible for stirring up hatred among the Chinese, and their selfish exploitation of Chinese wealth caused the birth of the spirit of nationalism among the Chinese. By sailing up the Yangtze, foreign battleships have broken an international law.

As for mob violence, the Chinese government is powerless to control it, Dr. Lum further stated. As a remedy to the present ill-feeling, extraterritorial concessions in China should be abolished, unequal treaties should be abrogated, and territory taken illegally from China should be returned, Lum declared.

### 218 U. H. Students Use Street Car Daily

Two hundred and eighteen students and other members of the University of Hawaii, use the rapid transit cars daily, according to a statement signed by them last week. Allowing thirty for those who use the trams, yet failed to sign the statement which was posted in Hawaii hall for three days last week, the total rises to something like 250.

#### Dissatisfied With System

Great dissatisfaction with the present service schedules was expressed by a good number of those who signed the statement. A professor said that under the 20-minute Manoa line schedule that was in operation until two weeks ago, he took over an hour to

### AN ANNOUNCEMENT

Physical Education For Men  
Second Semester, 1927.

All first and second year physically fit men students registered as regular students or special students, taking eight or more credit hours a semester and not registering for R. O. T. C., are requested to take three periods per week of Physical Education, registering in the course described below and reporting to Mr. Klum.

102. Required of Freshmen and Sophomores not registered for R. O. T. C. This course includes games, natural gymnastics, athletics and individual gymnastics. Second semester, three hours per week, two credits. Mr. Klum and Assistant.

D. L. CRAWFORD,  
President.

### VARSITY BASEBALL NINE LOSES FIRST GAME TO HONIRONS

The University of Hawaii baseball nine started its 1927 campaign by losing to the Honolulu Ironworks team 4 to 3 in a thrilling contest staged last Saturday afternoon at Moiliili Field. Incidentally, this game marked the inaugural of the 1927 Commercial League baseball series.

The opening was augmented by the presence of Charles N. Arnold, mayor of the city and county of Honolulu in his new role as hitter; David L. Crawford, president of the University of Hawaii, as pitcher; and Fred Bush, manager of the Honolulu Iron Works, as catcher. The new university president displayed rare form as a twirler, and the best that "His Honor" could do with the Varsity prexy's deliveries was to line out into the waiting hands of the first-sacker.

The Varsity pill-tossers outbatted the Waterfront boys 10-8, but committed two errors to their opponents' one.

N. Horio, the freshman pitcher from Maui, twirled a great game. With the

(Continued on Page 3)

### University Announces New Courses For Coming Semester

Several new courses will be offered at the university during the second semester, according to a notice posted outside the President's office. They include the following:

GEOGRAPHY 161. GEOGRAPHY OF NORTH AMERICA. A regional study of the continent of North America based on lectures and reference assignments. The course will emphasize the geographic factors affecting the location of cities, distribution of population, trade routes, industries and history of the different regions in North America. The course may be elected by any interested, although Geography 150 or Geology 252 are desirable prerequisites. Two hours, second semester.—Professor Freeman.

PHYSICS 355. X-RAY. The historical development of knowledge of X-Rays, theoretical considerations, bearing of X-Ray Research upon problems of modern physics, modern X-Ray technique. Two lecture-discussion meetings a week.—Professor Kirkpatrick.

EDUCATION 275. METHODS AND PRACTICE IN TEACHING VOCATIONAL AGRICULTURE. Special methods used in teaching vocational agriculture. Students must spend a part of the semester teaching voca-

(Continued on Page 2)

### THE NEW PRESIDENT

President David Livingston Crawford

"The increasingly important extension services of the University of Hawaii has been built up by Prof. (now Pres.) David L. Crawford, who also has been professor of entomology at the institution since 1917.

"Born in Sonora, Mexico, March 7, 1889, he is the son of Matthew Arnold and Harriett (Sturges) Crawford. His higher education was received at Pomona College, A. B., 1911; Stanford University, M. A., 1912; and Cornell University, 1913. He spent several years in Mexico as manager of a cooperative agricultural enterprise.

"He arrived in Honolulu in July, 1917, to join the faculty of the then College of Hawaii, later being appointed to the position of director of the extension service in addition to his other duties. For several years he devoted himself to building up athletics, especially football, at the then College of Hawaii and laid the foundation for the present notable achievements in this line. (He coached the collegians to their first senior league championship in 1919. He was instrumental in the success of Knute Rockne's mission to popularize football in Hawaii.) He also led in the campaign to build a swimming tank on the campus by donations of students and friends.

"President Crawford is a member of the University Club of Honolulu. He married Leona E. Mudgett on June 25, 1914. They have two children, James Mudgett and Agnes Joan Crawford."—"The History of Hawaii and Its Builders" by George F. Nellist, 1925.

### Aggies Elect Officers For Second Term

Hong Chang Wong, senior, was unanimously elected president of the University of Hawaii Aggie club for the second semester of this college year, as a result of elections held last week.

Earl Nishimura was chosen vice-president; Isaac Iwanaga, secretary; Jiro Suzuki, treasurer; Mary Kamm, librarian, and Iwao Itoh, steward.

#### Purposes of Club

The Aggie club was organized to further interest in agriculture in the university and throughout the Territory; to encourage the pursuit of scientific research along agricultural lines; to further the interest of others in the work of the University of Hawaii, and to foster the idea on the university and elsewhere of putting the university on an equal standing in agriculture with the agricultural institutions on the mainland.

The Aggie club is the only organization on the campus, other than the A. S. U. H. and the Student Y. M. C. A., that has its own club room. Here is found an extensive agricultural library. The club room is used during school hours as a study room and be-

### 3 Former Deans At Milwaukee Conference

That the recent intercollegiate conference held at Milwaukee, Wisconsin was truly "the most significant intercollegiate event of the present college generation," is declared in a letter received recently from George Sakamaki, who graduated from the University of Hawaii last June, and is now at the University of Wisconsin, studying journalism. Sakamaki attended the conference as one of the Wisconsin delegates. He writes:

#### 3000 Delegates

"This conference was held in a spacious auditorium in the heart of the business and hotel districts of Milwaukee, and was attended by more than 3000 students from Maine to California, from Washington to Florida, and from 32 countries all over the face of the globe.

"The conference was built upon the theme of the Accessibility of God. G. A. Studdert-Kennedy of London, England; Reinhold Niebuhr, Dr. Henry Sloane Coffin, Dr. A. Bruce Curry, Dr. Charles W. Gilkey, Editor Kirby Page, Dr. Robert A. Millikan, President Mordcai Johnson, and others gave inspiring addresses.

(Continued on Page 2)

### NEW PREXY PLANS BROAD POLICIES IN ADMINISTRATION

#### Goodwill Among Students And Faculty Members Encouraged By New Head

Continuation of the broad administrative policies of the university under Dr. Arthur L. Dean was assured by President David L. Crawford, in a statement to Ka Leo, issued in connection with his assuming his new responsibilities as president of the university, yesterday morning.

In his statement to Ka Leo President Crawford said: "I am taking up the new duty as president of this university with mingled feelings—regret at seeing Doctor Dean leave the office after so many years of successful leadership, and at the same time with confidence in the cordial goodwill of the students and members of our Faculty.

#### University Grows

"It has been most gratifying to watch the steady and solid growth of the University of Hawaii under the guidance of President Dean, for he took hold of a small institution of uncertain standing and has made of it a university which ranks with any on the mainland, and of which the Territory of Hawaii is justly proud.

#### Great Opportunities

"I am confident that the university is now on the threshold of a greater life, with great opportunities before it

(Continued on Page 4)

### Women's Casaba Team Plays Palama Friday

The women's basketball team of the University of Hawaii will start its season with a game against Palama on February 4 at the Palama gymnasium court.

Casaba candidates for the Varsity team have been practising during the past two weeks. The practices have been held every afternoon at 4:30, three days at the University court and two days at the Palama rectangle.

In the absence of Coach May K. Gay, who is at present on Lanai, Miss Blanche Bogert is coaching the basketball aspirants. Miss Venus Gay is captain of the team. Those who are turning out for daily practice are: Venus Gay, Blanche Bogert, Alice Lyser, Regina Christopherson, Lydia Cox, forwards; Margaret Pratt, Isabel Hockley, Winnifred Webster, Gladys Bartlett, Clarissa Coney, Anne Moore, Alice Nieman, centers; Helene Bartels, Metha Jensen, Ada Forbes, Janet Haughs, and Lois Thompson, guards.

On February 11, the Varsity women cagers are scheduled to play the Normal quintet. The rest of the schedule is not yet definitely decided.

### Miss Miller's Class Visits Love's Bakery

Love's Bakery, on Prison road, was visited on Friday afternoon, January 21, by the class in House Science 102, under Miss Carey D. Miller, assistant professor of food and nutrition at the university.

The students were shown through all the different departments, and were able to see at first hand the different processes involved in the making of Love's bread.

#### Dough Is Mixed

First they saw the dough being mixed in mixing bins, from which it went to huge vats where it was allowed to rise. The dough was then made over into the shape of countless loaves, and every other loaf was weighed, to see that the weight requirements were being met.

# EDITORIAL

## GREETINGS

To President David L. Crawford, Ka Leo extends, on behalf of the student body, hearty greetings. We have full confidence in you; and we pledge you our support in the carrying out of your administrative policies. We share with you the desire to build a bigger and better university.

To Dr. Arthur L. Dean we wish to express our keen regret that we are to lose his services as president, and our equally keen joy that he is going into a field of work for which he is so eminently fitted with great possibilities for fruitful work in the service of mankind.

## BUILDERS

A new president for the University of Hawaii means a new builder. Doctor Dean has been a builder, a master builder. Taking this institution in the crude, uncertain form he found it 12 and a half years ago he has whipped the material into shape, and laid the foundations for a truly great university. Even today this university ranks with the best universities of its size in the country. But our university is still only in the making. It is not a finished structure; it has just been begun.

Doctor Dean has laid the foundations and started the erection of the structure. He now responds to another call, and begins the building of a great pineapple research institution. President Crawford has taken his place as the university's builder and engineer. In his hands is entrusted the work of continuing the building process. A man of vision, an able executive, and a man endowed with an enormous fund of hard common sense and practical ability, President Crawford is an ideal selection as successor to Doctor Dean. With the intelligent, hearty support of both student-body and faculty he should be able to build the university into a world-renowned institution.

## THE PINES PLANT

We note with deep satisfaction the building of the new pineapple research plant on the campus. It is going to mean that the research work of the pineapple association will continue to maintain its intimate relations with the university, perhaps even more intimately than ever before. We are glad that Dr. Dean is to be full-time director of the research work, and that the students of the university will have every opportunity to correlate their university work with their research studies in the laboratories of the pineapple association. We trust that other research plants will be built and developed in as intimate a relationship. It will mean the building of a truly great university.

## TEACHING PEACE

We wonder if it would not be of greater value to mankind were the University of Hawaii to require of her undergraduate men students, instead of our present two-years' compulsory course in learning how to fight the next war, a two-years' course in learning how to prevent the next war.

## UNIVERSITY OF HAWAII

Have faith in the University of Hawaii. Some day it is going to be the best known, most highly respected, and truly the greatest university in the world. Even today our university is unique; it has no rival institutions of its type; it knows no peers. Our strategic position at the meeting of the highways of civilization in the Pacific gives us unusual opportunities. No one city has seen more international conferences of varied types than Honolulu. Consider also the tremendous interracial problem that is being worked out here. The world looks to Hawaii. Hawaii in turn is looking more and more to the university. Let us work towards the building of an ever greater and bigger university.

We are now making tradition for the coming years. Let it be not only football tradition, but traditions of high scholarship, noble aims, and a brotherly spirit of comradeship on the campus, across all lines of race, color, caste or creed. Let it be a tradition of united effort directed towards the attainment of common aims. Let it be a tradition of fearless, scientific inquiry into, and study of, vital campus and world problems; courageous and wise leadership in the best thought of the day; optimistic, practical idealism; friendly tolerance of one another's personal views, and a rugged, indomitable stand for the highest moral and ethical principles governing human relations.

We are men, not dumb cattle. Each one of us has a distinct contribution to make, as an individual. Let us, then, strive to develop whatever innate capacities we may have to the end that we may direct those capacities into productive channels of work and service. We are not in college to learn to be drones. Vigorous productive activity, spiritual, mental, physical: that is our high calling.

Not only as individuals, but as an university we also have a distinct contribution to make to the progress of mankind. We have wonderful opportunities and possibilities. We have made a fine start with Dr. Arthur L. Dean to lead us, now with President Crawford, let us work together with renewed zeal and faith. Some day what little we do will bear abundant fruit.

## A WORD OF ALOHA

We shall miss Prof. William C. Smith and Prof. Kikujiro C. Kon-do this semester. They have served well, and have won both the respect and the love of the students and the members of the faculty. We bid them fondest Aloha. And we extend our glad welcoming hand to Dr. Romanzo Adams and Dr. Tasuku Harada. Dr. K. C. Leebrick returns to his post as professor of history and political science, this morning. To him also we extend our welcoming. Aloha!

## GOOD LUCK

Ka Leo wishes the returning members of the faculty and the students of the university good luck and a successful second semester. We also look forward to an era of good feeling, cooperation and progress under the new administration. —H. S.

# Milwaukee Conference

## Discusses World Topics

(Continued from Page 1)  
Meets Hawaii-ans

"Shigeo Soga '28, Peter Lee '28, and I had a happy reunion at the conference. We three bade Aloha to one another in Honolulu last summer, and we were overjoyed to see each other so soon. Shigeo reports that he is getting along in good shape at the University of Missouri, where he is majoring in sociology. Peter has put on considerable weight, and seems to be happily adjusted at the University of Indiana.

"A score of other Hawaii-ans were also at the conference, including Dr. Albert W. Palmer and his daughter, Helen, of Oak Park, Chicago; Miss Hattie Kanda of Elima College, New York; Misses Priscilla (U. H. '23), and Martha Choy, both of the University of Michigan; Miss Kazuko Higuchi of Oberlin college, Ohio; Masaji Marumoto, of the University of Chicago; Dr. Hall, formerly of Koloa, Kauai, now professor of history in a Michigan college; George H. Goo, of the Ford School of Technology, Detroit.

### Rugs At Conference

"I had the pleasure of meeting Dr. Arthur Rugh, uncle of Dwight Rugh (student Y.M.C.A. secretary of the U. of H.) He is a peach of a man,—just like Dwight. I also met Dwight's sister who came as a delegate from the San Jose Normal, California. She is just like Dwight too.

### Against College Militarism

"Editor Kirby Page delivered an address on the R.O.T.C. which, he pointed out, is an organic part of the war system. The compulsory feature to be found in some colleges and universities is foreign to the oldest and best American traditions, he declared very emphatically.

"The deadly thing about the R.O. T.C.," he said, "seems to me to be this, not that it makes students blood thirsty, but that its net result on the campus and in the community is to increase confidence in the war method, to arouse suspicion and fear of other nations, and especially to increase the degree of cynicism concerning peaceable means of maintaining security and justice."

### Hits War System

"The evidence seems conclusive," Page continued, "that war is futile as a means of attempting to settle international disputes; is ineffective as a way of achieving security and justice; is a prolific source of further conflicts; is rapidly becoming suicidal; is a combination of the major evils of our day, is utterly contrary to the teachings and example of Jesus; and is the supreme denial of the Fatherhood of God and the brotherhood of man.....for me to sanction or participate in war would mean the abandonment and renunciation of Jesus' religion."

### In Case of War

To the proposition "I am ready to support some wars and no others," 740 delegates voted Yes, while 327 declared they would support no war. Those who would give their support to all war numbered 95; 356 were undecided.

### Economic System Wrong

Eight hundred believed that the present economic system which is founded on a policy of production for profit and not for use is "wrong." Thirty-eight felt that, notwithstanding its evils, the modern capitalist system is essentially compatible with Christ's teachings. To the following resolution 385 subscribed: "In order to transform the present wrong economic system, we believe that all the students should do all in their power to strengthen and improve the organized labor movement."

### Co-Operative Distribution

As a substitute for the present economic system 592 voted for a cooperative distribution system wherein the workers share in control. Fifty-seven delegates felt that communism was preferable to the present system.

While there were decided opinions on many subjects a desire for further study was expressed unanimously in a resolution saying in effect:

### Desire To Study More

"Realizing the limitation of our information on the great themes before the conference we ask that the colleges and universities provide better opportunity for learning the facts concerning international relations the cause and cure of war, industrial injustice, social unrest and the problem of religion in the modern world. We also ask for opportunity to hear upon our campuses the expression of minority opinion by speakers chosen by the students."

# New Courses Offered

## During 2nd Semester

(Continued From Page 1)

tional agriculture in some school of the Territory. Designed especially for seniors. Hours to be arranged by instructor. 5 to 10 credits, second semester.—**Professor Armstrong.**

ZOOLOGY 253. VERTEBRATE EMBRYOLOGY. An introductory course in which those principles involved in development are illustrated by study of the embryology of the chick. Test: Patten's "Embryology of the Chick." Prerequisite: Zoology 151. Lecture and laboratory periods Tuesday and Thursday 1:30-4:30. Fee \$3.00. Second semester, 3 credits.—**Mr. Hannum.**

HISTORY 261. EUROPE SINCE 1890. A study of the history of diplomacy and international relations from the last decade of the nineteenth century to the present time. Special emphasis will be laid upon the World War and its attendant problems. No one text is used; assigned reference readings. Prerequisite, History 100. 2 credits, second semester.—**Professor Leebrick.**

HISTORY 255. THE HISTORY OF THE AMERICAN CONSTITUTION SINCE 1800. A continuation of History 252 carrying the study to the most recent time. The evolution of present constitutional questions will be traced. No one text will be used; assigned reference readings. Prerequisite: American Institutions or History 140. Although a continuation of History 252, that course is not a prerequisite. 3 credits, second semester.—**Mr. Hooley.**

INTERPRETATION. A study of selected poems and other material for the purpose of training in oral reading. Tuesdays and Thursdays at 11:30 or Mondays and Wednesdays at 1:30. 2 credits, second semester.—**Mr. Baker.**

CHEMISTRY 214. PROBLEMS IN PHYSICAL CHEMISTRY. A course dealing with the solution of problems pertaining to the topics which form the titles of Millard's "Physical Chemistry for Colleges." It is advised that this course be taken concurrently with Chemistry 211. Test: "Physico-Chemical Calculations," by Knox. Open only to students who are taking or have taken Chemistry 211. One hour class room a week. First and second semesters, 1 credit each.—**Assistant Professor Bilger.**

H. S. 151. ELEMENTARY NUTRITION. A study of the principles of diet in relation to health and their application in planning and preparation of meals for the family. Two lectures and one laboratory. Prerequisite: H. S. 150 or a knowledge of cooking processes satisfactory to the instructor. Not open to students majoring in Home Economics but open to all others. This course is also open to auditors. Fee \$5.00. Second semester, 3 credits.—**Assistant Professor Miller.**

PHYSICAL EDUCATION 275. A course intended for men who expect to handle Physical Education activities in secondary schools, and covering the coaching of secondary school sports, the supervision of playground activities, etc. . . . Restricted to Juniors and Seniors with registration contingent upon the consent of the instructor. 2 credits.—**Mr. Klum.**

MILITARY SCIENCE AND TACTICS 211. A course covering subject matter of examination for promotion in the Reserve Corps. Elective course for Reserve Officers and Seniors. First and second semesters. Two hours classroom or laboratory periods per week. 2 credits. Hours second semester 1927 by arrangement. Those desiring to register for this course please indicate available days between 8:30 a. m. and 9:30 a. m.—**Adna G. Clarke, P. M. S. & T.**

HISTORY 125. HISTORY OF CHINA (second semester). This course is open to a few students who have not taken the first semester's work but who desire to study the Modern Period of China's History. Before registration permission to take the course must be obtained from the instructor.—**Professor Lee.**

PHILOSOPHY 200. This course will be open the second half year to Juniors and Seniors who obtain the consent of the instructor. It will sketch the history of Modern Philosophy. 3 credits.—**Professor Myrick.**

# A Survey of Mainland

## College Activities

### University of Denver

"We want a night shirt parade too" declare the co-eds. This is what the university women said when they heard about the plans the men were making for the nightshirt parade. They immediately announced their desire to have one too.

Strong opposition from the dean of women and president of the college caused the women to state that they would much rather watch the men's parade than stage one of their own, anyway.

### University of California

The police department recently sent two trucks manned by cops on a round of some 40 fraternity houses for the collection of "souveniers" such as signs etc. Among other things were found a cemetery sign, 100 street construction lanterns; three fire axes, three life preservers, two small striped barber poles, 30 automobile association signs, a large sidewalk signboard of an oil company, three "No Parking" and "Reserved Space" standards, a bridge sign, 20 or more real estate signs, and 12 apartment house signs.

### University of Washington

Failure to make men keep their distance will be no excuse for breaking the pledge emblems by pledges of Iota Sigma Pi, women's national chemistry honorary. The emblems are small fragile side-arm distilling tubes which pledges must wear at their sides for 10 weeks or more.

Should the glass distilling tube be shattered, the pledges must wear two tubes of their own workmanship instead.

### Indiana University

Men as well as women have been wearing fur coats to class this season. So universal has the fad become that Will Rogers, America's greatest humorist, while in Indianapolis last year said he now realizes why he had not been graduated from a university. He couldn't afford to buy a raccoon skin coat.

### Stanford University

It has been often considered a mystery why the men at this university outnumbered the women five to one, there being 500 girls and 2500 men. This was brought about in 1899 when Mrs. Stanford stipulated that the number of women attending should at no time exceed 500. This was done to avoid the possibility of Stanford's becoming a women's seminary.

### Princeton University

The "huddle" system employed of recent years in football, may be taken as defensive tactics.

### Swathmore College

Recent statistics compiled by Dean Raymond Walters, place Columbia university first in enrollment with 29,701; California second with 24,628; New York university third with 19,900; and Minnesota fourth with 18,200. California leads in full time students with 16,29. Columbia follows with 11,727 students.

Of the women's colleges, Smith leads with 2,153 students, Wellesley ranks second with 1571, and Vassar is third with 1149.

## Rainbow Ball-Tossers Lose Close Contest

(Continued from Page 1)

exception of the first inning, when his unsteadiness resulted in four runs and five hits for the Iron Workers, he held his opponents scoreless for the remainder of the contest. Joe Gerdes was the Deans' slugger, smacking out the old apple for three hits out of five trips to the plate. "Fat" Nakamura, short-stopper, Eddie Fernandez, keystone guardian, and Al Lemes, third sacker, gave inspiring support, the trio accepting 19 chances, with only one miscue.

### The Game

The Ingots started the fireworks in the opening frame by denting the rubber on four occasions as a result of five hits garnered off N. Horio. The Deans launched a counter attack but managed to secure only one run. For the next seven innings, both nines battled on even terms. In the latter half of the final canto, the Varsity diamond knights staged a beautiful rally. By a supreme effort, they earned two runs; but it was not sufficient to knot the count. Final score: Honolulu Iron Works, 4; Hawaii 3.

## University Students Patronize Street-Car

(Continued from Page 1)

reach his Manoa home from the Bere-tania mission, one night.

### Take Hour for Trip

Students from Kaimuki generally take a full hour to reach the university, unless they happen to make exceptionally fast transfers, not only at Pawaa but at Punahou. A student in zoology took an hour to go from the university to the zoology laboratory at Waikiki. The wish was expressed that better connections at transfer points be arranged by the Honolulu Rapid Transit company, or that a through line from Kaimuki and Waikiki to the university be established.

### Hard For 7:30 Classes

Students taking physical education or R. O. T. C. at 7:30 o'clock in the morning are greatly handicapped by the slow, uncertain service that now exists. Especially exasperating, they say, are the long waits at transfer stations.

The following names were signed to a sheet posted in Hawaii hall last week for all who use the street cars daily to attend the university:

Henry Tom, S. Hino, G. Martin, M. Heminger, D. McCoy, Earl Nishimura, M. K. Lau, H. R. Shaw, S. Koike, E. Baker, T. Daishi, Y. Tanaka, Chief Lindsey, F. Jansen, J. Jorgensen, W. Lydgate, T. N. Tanaka, K. Ito, D. Ishii, Fred Lambert, A. V. Dishman, A. K. Yoshinaga, Jas. Watanabe, Julio Leonor, A. Caceres, G. Rourke, M. Wright, G. A. Pearce, H. C. Wong, Margaret Steger, Ruth Komuro, Nuyk Yin Chong, Salome Lee, H. Lam, E. Ting, L. Ferreira, E. Towse, David Kamai, Donald Morrison, Norman Ault, John Devereux, Harry H. Takata, I. Seto, A. Octavio, Ah Kong Chun, A. Aoki, E. T. Ching, A. Kaumeheiwai, Kiu Sui Hew, M. Machado, G. Kadota, Koto Nakamoto, S. U. Tseu, J. Moriguchi, A. Like, Wm. Kaeo, Ed Cushnie, J. E. St. Sure, N. Hall, U. K. Das, J. Oliveira, R. Kau, Q. L. Ching, M. S. Wong, Bernard Farden, Justino D. Pagdilao, Jesus Cayaban, Blanche Pope, M. Inaina, M. Torigoe, J. Kaya, M. Takahashi, Percy E. Smith, Oliver Yanaga, Thos. Tanimoto, Hideshi Iwamoto, Masao Aizawa, Hideo Kimura, Francis Fong, H. Gomes, J. Nakamura, H. Hormann, F. Fong, Arthur J. Wriston, Sanachika Mimura, T. Kwong, Kwan Heen Ho, W. Mihata, L. Thomas, T. ## DEANS SOCCER TEAM HOLDS LAST-YEAR CHAMPS TO DRAW

Fighting desperately to the last minute, the University of Hawaii soccer players held the powerful Rangers, two-time champions, to a one-all draw, in a fierce contest waged last Saturday afternoon at Makiki Field.

Captain "Union Pacific" Das, and the Dease brothers put up an encouraging game for the Deans. Despite injuries, the doughty Varsity pilot battled heroically. He checked many shots heading for the Deans' goal and boot-ed them out of danger. Maitland Dease almost succeeded in scoring in the first minute after the kickoff, the ball missing its destination by inches. Jensen, the goalkeeper, also starred for the Rugh-coached soccer team. He averted a defeat by stopping a swift boot from penalty kick formation in the last 30 seconds of play.

### The Fireworks

The Rangers scored first when Y. K. Lee booted the ball into the net from the 20-yard stripe. The Deans, however, were not discouraged. A few minutes later, they rallied and knotted the count at one-all. Thereafter, both teams fought frantically to tally the winning score; but the two contestants rose equal to the occasion, and the game resulted in a draw.

The starting lineups follows:

Rangers	U. of H.
Positions	
Ricketts	Jensen
G.	
Rattray	Das
R. B.	
J. Muirhead	Morrison
L. B.	
G. Hart	Kaeo
R. H.	
W. Muirhead	Cushnie
C. H.	
Lamb	Ferreiro
L. H.	
Wink	Morse
O. R.	
Goskirk	Kahanamoku
I. R.	
Anderson	Dease, D.
C. F.	
Walker	Dease, M.
I. L.	
R. Hart	Downs
O. L.	
Officials—Referee, Creevey; linesmen—Hogg and Alban.

## House Science Class Learns Bread-Making

(Continued from Page 1)

Then came the rolling by machinery and testing for rising qualities. After this they were put into tins and baked in a huge gas oven. The dough went in at one end of the oven, to come out the other as baked bread. The heat in the ovens can be regulated, for the different kinds of bread.

### Run By Machines

Love's Bakery, which is the largest bakery in town, is run almost entirely by machinery, and the equipment is of the latest models.

Most of the bakeries in town burn oil, but Love's has found gas to be more successful.

### Huge Output of Bread

The daily output is roughly 18,000 loaves. On Fridays, the output reaches 24,000 loaves. This includes Blue Bird bread, Cream bread, Staff of Life, French loaf, Raisin bread and various kinds of buns. The Love's Bakery delivers its food products all over town, as well as shipping to other islands.

### Fortunate Girls

The members of the Household Science class who went on this visit included Miss Alice Denison, Miss Eva Fleener, Mrs. Leta T. Taylor, Miss Chiyoko Sadayasu, Miss Dorothy Waters, Miss Venus Gay, Miss Jean Widfield, Miss Olive McKeever, Miss Edith Greig, Miss Sylvia Dean, Miss Wong, Miss Betty Steere and Miss Christine Doty.

### Make Many Visits

The establishments which were visited by the class during the first semester were the Honolulu Dairymen's Candy shop, May's Coffee shop, Oahu Ice company refrigerating plant, Love's Bakery on Nuuanu street, where crackers, cookies and other pastries are made, Love's bread bakery and Leroy's bakery.

Harry Skinner—Hot dog, look what a pretty tie, I wonder who lost it. Hey! Sterl. What do you think of my new tie? I found it.

George—Hey, who the heck took the rag I have been wiping my brushes on?

English Prof.: Correct this sentence: "Before any damage could be done, the fire was put out by the volunteer fire department."

Frosh: The fire was put out before any damage could be done by the volunteer fire department. —Drexlerd.

## Farmers Hold Election Of Club Officers

(Continued from Page 1)

fore and after hours and at noon recess as a gathering place for many agricultural discussions. All meetings are also held in the club room.

### Speakers Address Club

Prominent men in the Territory and often from the mainland when passing through Honolulu speak to the club at the monthly meetings held on Monday evenings. Business meetings are held at noon every second week on Mondays.

The officers of the club for the first semester were Harold Shaw, president; Hong Chang Wong, vice-president; Isaac Iwanaga, secretary; Makoto Takahashi, treasurer; Mary Kamm, librarian; Fred Paoa, steward.

For Hair That Won't  
Stay In Place  
Try This

Well-groomed boys and girls keep their hair smooth, lustrous, always in place—with Stacomb. It has made straggly hair unnecessary. Fine for bobs and after shampooing. Non-greasy. Tubes 35c, jars 75c, liquid 50c.

FREE! TEAR OUT!

Agt. Standard Laboratories  
of N. Y., P. O. Box P254, Honolulu,  
T. H.

Please send me, free, a generous  
sample tube of Stacomb.

of serving the people of these islands and taking its part in the development of that new civilization of the Pacific. "With mutual confidence between students and faculty and hearty co-operation among all, we shall move forward in the steady growth for which we are destined."

**No Formal Ceremony**  
President Crawford entered his new duties without formality, yesterday morning, shunning ceremony or ostentation. He walked into the president's office and took his place at the president's table quietly and modestly and immediately started in on his new tasks.

Although the transfer of responsibilities was made without formal ceremony, it is expected that due recognition of the change will be given at the commencement exercises in June.

**Continue Extension Work**  
President Crawford will continue to act as director of the extension service of the university until the end of the present college year, notwithstanding his new responsibilities as head executive of the university, it is announced.

**Appointed December 23**  
Mr. Crawford was elected to the president's chair by the Board of Regents of the university, at a meeting of the board held on December 23, 1926, when Dr. Arthur L. Dean's resignation from the position was accepted, and Professor Crawford's election announced.

President Crawford has had considerable experience both in active administrative and teaching work. He has been a member of the staff of this university for over ten years, during which time he has held the title of professor of entomology and, during the past two years, director of the extension service.

**Director of Extension**  
Taking over the position of full-time director of the extension service, Mr. Crawford has built up a department that ranks favorably with the extension departments of the largest mainland universities. Mr. Crawford has also taken keen interest in student activities ever since he came to the university.

NOTICE

There will be a tryout for the remaining position on the Junior class debating team on Thursday, February 3, at 4 o'clock in Room 107, Hawaii hall.

The question: Resolved, That the Philippine Islands should be given immediate independence.

which are more precious than our lives.

**Not a Military Nation**  
"The United States has never been, is not, and I think never will be, a military nation. We have not relied on arms to achieve greatness, or make our place as a nation. Nevertheless, we have had wars. Human nature is slow to change. Its fundamental passions are much as they were back as far into the thousands of years of our history as we can see. It is likely to be many years before mankind shall have so far overcome the limitations and passions of his being that wars shall wholly cease. With humanity as it is, and mankind what it is, there is no assurance that we shall not again find ourselves at war."

**Army of Citizens**  
"We have always relied on an army of citizens. In mobilizing the citizens of a nation the critical factor is a sufficient body of trained officer material. The purpose of the Reserve Officers' Training Corps is to furnish from those of superior natural endowments and superior opportunities, a body of trained men on whom we can rely in the time of our need, if and when such a time shall come. It is wholly fitting that you, who are beneficiaries of the nation and the Territory, which are giving you an education, should include in that education a training which will make you fit to play your part for our country in time of need."

**Opportunity to Serve**  
"This is the opportunity which is given to you to prepare to serve your country in the time of crisis, and to serve as befits men of your abilities and opportunities."

Hawaii As Seen By  
The South Dakotan

In the January 11, 1927, issue of The Industrial Collegian, weekly student paper of the South Dakota State College, a column on the editorial page, titled "99 44-100 Per cent Pure," has among other interesting items, this choice bit of information concerning the Hawaiian Islands:

"The boys will probably come back well informed on Hawaiian history so the following brief synopsis is given to enable one to converse intelligently with them on the subject until they become interested in something else."

"The Hawaiian Islands have been located in Pacific ocean since October 23, 1926. Before that they were located in the Pacific ocean. They were discovered by Doctor Cook, (no, Roger, not the Doctor Cook who found the North Pole and climbed Mt. McKinley), but were called the Sandwich Isles by him because as he neared he saw a pig standing between two breadfruit trees. When he landed he walked up to a tribe of natives, and said, 'Hello, how are you?' They were all right so they took him to lunch—on a platter. When the next explorers came to the Islands they asked the natives what they called the place, and as the only English they knew was Cook's greeting, answered, 'How ah ya.' The name has been used ever since."

Medical Missionary  
Honored At Dinner

Prof. and Mrs. S. C. Lee gave a Chinese supper last Saturday evening at the Orient Chop Sui honoring Dr. and Mrs. Kinnear for 30 years a medical missionary in Foochow, China. Dr. and Mrs. Kinnear is visiting their son, Gerald Kinnear, treasurer and purchasing agent of the University of Hawaii.

Other guests at the dinner include: Prof. and Mrs. Donaghho, Mr. and Mrs. Gerald Kinnear, Prof. and Mrs. F. G. Krauss, Dr. T. P. Chou, Dr. Ellen Leong and Dr. and Mrs. M. H. Li.

"At present the population consists of — saps who spend their time gardening, swimming, playing the ukulele, dancing and dodging lava. The hula-hula girl is to the Hawaiian what chop-suey is to the Chinese. The ukulele is their revenge against civilization. It is estimated that forty-seven writers and eighty-two movie actresses would have starved to death had the islands not been discovered."

"At Honolulu is located the seat of learning, the University. They thought they had a good football team until Christmas Day and then when they met the Jack Rabbits they decided there 'ain't no Santa Claus."

The examinations will be held two weeks from today, beginning at 8:00

Business Manager  
Chooses Assistants

The following students have been appointed by H. C. Wong, business manager of the Dramatic club, on the business side of the production committee for the coming semester's play, "The Admirable Crichton": Percy Smith, assistant business manager; William Lydgate, advertising manager; Elmer Harpham, electrician; Orme Cheatham, stage manager; and E. W. Keyes, ticket manager.

Rehearsal Schedule

Rehearsals for this semester's play, "The Admirable Crichton," have been scheduled as follows:

- Feb. 1, Tuesday, 3 p. m.
- Feb. 2, Wednesday, 7 p. m.
- Feb. 3, Thursday, 7 p. m.
- Feb. 4, Friday, No rehearsal
- Feb. 5, Saturday, 1 p. m.
